

In the Abstract:

Please delete the paragraphs set forth at lines 1-10 on page 15 of Applicants' application as filed, and insert the following paragraph therein:

A coated substrate configured for printing a toner image thereon includes a paper substrate and an underlayer coating applied directly on the substrate. The underlayer coating includes amine terminated polyamide. The coated substrate further includes an overlayer coating applied directly on the underlayer coating, where the overlayer coating includes a polymer material to which the toner image can be fused and fixed.
